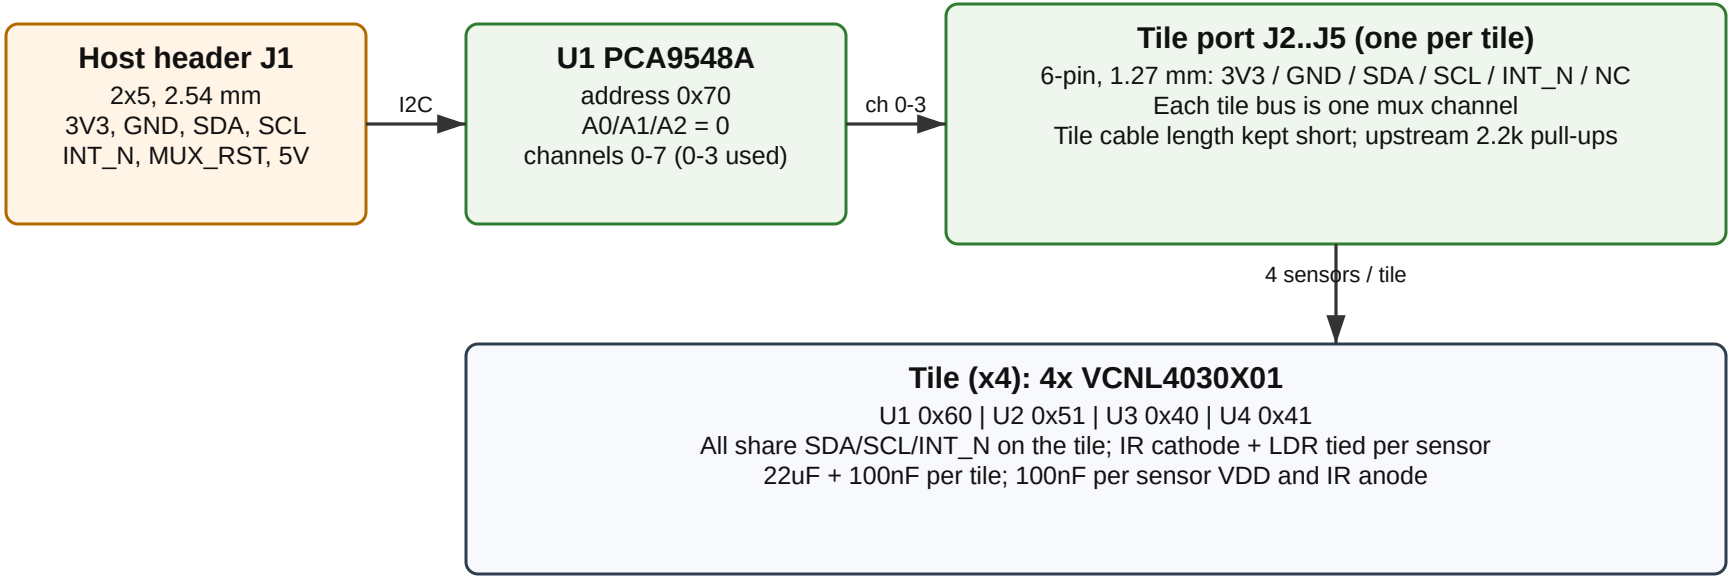
PSM V3 - Modular Tile Topology (Prannav improvements)

One mux, four 2x2 tiles, four factory I2C addresses per tile. Expandable to 8 tiles / 32 sensors.



Why this is an improvement

V1: 2 muxes, 16 channels, fixed 0x13 sensors. V3: 1 mux, 4 channels, four addresses per tile.

Tiles can be placed on the car-seat contour and replaced individually; the hub supports up to 8 tiles.

Tile: 30 x 30 mm, 0.2 mm flex, sealing ring + conformal coat. Hub: 60 x 40 mm, 1.6 mm FR4.
