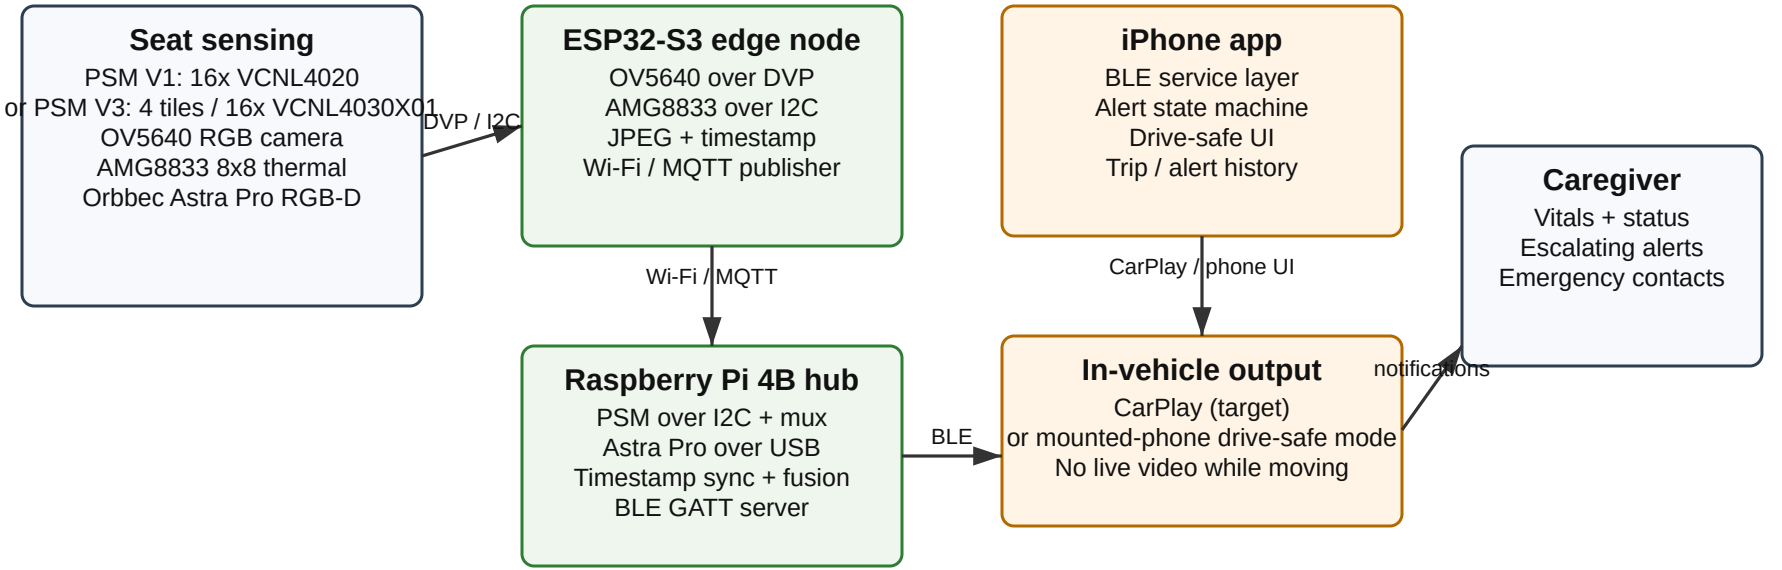
Instrumented Infant-Child Car Seat - Data Path

Research prototype. V1 is the thesis reproduction; V3 is the modular sensor upgrade.



Design note

The Pi owns acquisition and fusion. The phone owns the alert state machine and escalation. The PSM is not a certified medical device.

V1 uses two PCA9548A muxes (0x70/0x71) for 16 VCNL4020 sensors. V3 uses one PCA9548A (0x70) for up to 8 tiles.
